Academic History

Midwifery College of Utah

Bachelors in Midwifery

2021 - Present

"The BSM program provides a general education and prepares graduates to become a knowledgeable, skilled and independent Certified Professional Midwife who specializes in community birth settings. BSM graduates will have knowledge of and proficiency in MEAC's Curriculum Checklist of Essential Competencies, which includes the internationally recognized core competencies and guiding principles set forth by the International Confederation of Midwives (ICM) in addition to requirements for national certification of the North American Registry of Midwives (NARM) and the core competencies of Midwives Alliance of North America (MANA)."

- *MCU vision and objectives*

Central Washington University

Bachelors of Science | Business Management and Organizational Management

2013 - 2017

This degree bestows an understanding of how economy and corporate business structure operate. It gives an idea of how to manage a team of people effectively in a professional setting.

Central Washington University

EMT Certification

2017

This 200+ hour course, taken over the span of 3 months, provides both didactic and hands-on experience in BLS skills training. After the completion of this course, students are expected to be able to successfully pass the National Registry exam for Emergency Medical Technicians.
